## Interests

I like to challenge myself with new projects and see how I can improve and develop them along the way. I am always seeking out and trying to master new skills. I have a passion for all things technical, computers, machinery, cars, etc. and enjoy figuring out the inner workings by breaking them up and putting them back together. I enjoy working with my hands and to see the results of my work gives me a great sense of achievement. I like to work with plants, animals, and physical materials such as wood, tools, and machinery. Those activities that include practical, hands-on problems and solutions.
